aline

La bellezza estetica della linea **Aline** è caratterizzata dall'applicazione di inserti in alluminio satinato da 10mm e da 30mm che rendono il portoncino d'ingresso moderno ed elegante sia nella versione cieca che in quella vetrabile, in cui sono previste cornici bifacciali lineari. Al fine di rendere ancora più gradevole la linearità di questi pannelli è disponibile la serie **Aline Air** caratterizzata dalla presenza di cornici a filo nel lato interno del pannello. Esse conferiscono la complanarità anche alla superficie interna del pannello, salvaguardando la sicurezza del vetraggio unitamente all'eleganza del risultato finale.

La serie **Aline Air** è disponibile nella versione vetrabile di tutti i modelli di questa linea nello spessore 36mm/40mm/44mm/48mm oppure per richieste *su misura* con ribassamento che porta lo spessore perimetrale a 28mm.

Pannelli da blindato

Tutti i modelli Duet sono realizzabili anche nella versione da blindato.

Per rispondere alle esigenze di tutela della vostra abitazione e di garanzia della tranquillità domestica, Duet vi offre l'opportunità di avere il modello che preferite anche nella versione pannello per blindato. Grazie ad essi è possibile coniugare l'eleganza del pannello che più si adatta allo stile della vostra casa alla sicurezza data dalla struttura blindata su cui vengono applicati.

I Pannelli da blindato Duet sono realizzati a misura, secondo le dimensioni perimetrali richieste e secondo le esigenze tecniche di applicazione dell'azienda produttrice. Sono disponibili, in una selezione di articoli, anche nella versione s vetrata, come riportato negli schemi ed nelle immagini del presente catalogo.

I decori hanno in generale una dimensione standard, ma possono tuttavia, in funzione di particolari esigenze, essere realizzati su misura e/o su disegno (previa verifica di fattibilità). A completamento del sistema, sono infine disponibili anche il profilo di copertura della battuta Centrale, il Kit Coprifili perimetrali, ed il distanziale a misura interno ed esterno del vetro rivestito sui 3 lati.
